Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of how the Web client communicates with the Web server and transmits BBS display message data to the present apparatus and how the data is then displayed on the apparatus of the first embodiment, page 7, line 2, page 26, lines 17-22.

II. Species of control corresponds to a process executed by the image processing apparatus to transmit information required to cause the Web client's terminal device to not display the message information or to display the message information of the second embodiment, page 30, line 5, page 32, lines 6-27, page 33, lines 1-5.

III Species disclosed in fig. 18, 19 of the third embodiment (page 36, line 11).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
